

RaceDay API Endpoint Table

Part 1 - System Planning and Database | API base path: `/api`

Role definitions

Public: No account required. **Participant:** Authenticated user with Participant role. **Organiser:** Authenticated user with Organiser role.

Endpoint specification

Method	Route	Description	Role	Request body	Expected response
POST	<code>/api/auth/register</code>	Creates a new Participant account.	Public	firstName, lastName, email, password, phone	201 Created; 400 Bad Request; 409 Conflict
POST	<code>/api/auth/login</code>	Authenticates a user and returns access token and role.	Public	email, password	200 OK; 401 Unauthorized
GET	<code>/api/profile/me</code>	Returns authenticated user's profile.	Participant / Organiser	None	200 OK; 401 Unauthorized
PUT	<code>/api/profile/me</code>	Updates editable profile fields.	Participant / Organiser	firstName, lastName, phone	200 OK; 400 Bad Request; 401 Unauthorized
GET	<code>/api/events</code>	Lists upcoming/active events with optional filters.	Public	None	200 OK
GET	<code>/api/events/{id}</code>	Returns full event details, organiser, route and categories.	Public	None	200 OK; 404 Not Found
POST	<code>/api/events</code>	Creates a new event owned by the logged-in organiser.	Organiser	name, description, eventDate, registrationOpen, registrationClose, venue, city, province, distanceKm, eventType, status	201 Created; 400 Bad Request; 401 Unauthorized; 403 Forbidden
PUT	<code>/api/events/{id}</code>	Updates an organiser-owned event.	Organiser	Event fields	200 OK; 403 Forbidden; 404 Not Found
DELETE	<code>/api/events/{id}</code>	Deletes an organiser-owned event where rules allow.	Organiser	None	204 No Content; 404 Not Found; 409 Conflict
GET	<code>/api/events/{id}/categories</code>	Lists categories for an event.	Public	None	200 OK; 404 Not Found
POST	<code>/api/events/{id}/categories</code>	Adds a category to an event.	Organiser	name, distanceKm, entryFee, maxEntries, minAge, maxAge	201 Created; 400 Bad Request; 403 Forbidden; 404 Not Found
PUT	<code>/api/events/{id}/categories/{categoryId}</code>	Updates an event category.	Organiser	category fields	200 OK; 403 Forbidden; 404 Not Found
DELETE	<code>/api/events/{id}/categories/{categoryId}</code>	Removes a category when allowed.	Organiser	None	204 No Content; 403 Forbidden; 404 Not Found; 409 Conflict
GET	<code>/api/enrolments/me</code>	Returns authenticated participant's enrolment history.	Participant	None	200 OK; 401 Unauthorized; 403 Forbidden
POST	<code>/api/events/{id}/enrolments</code>	Enrols participant in one category.	Participant	categoryId	201 Created; 401 Unauthorized; 404 Not Found; 409 Conflict
DELETE	<code>/api/enrolments/{id}</code>	Cancels participant's own enrolment.	Participant	None	204 No Content; 403 Forbidden; 404 Not Found
GET	<code>/api/events/{id}/enrolments</code>	Lists all enrolments in an organiser-owned event.	Organiser	None	200 OK; 403 Forbidden; 404 Not Found
GET	<code>/api/results/me</code>	Returns participant's personal results.	Participant	None	200 OK; 401 Unauthorized
GET	<code>/api/events/{id}/results</code>	Returns results captured for organiser's event.	Organiser	None	200 OK; 403 Forbidden; 404 Not Found
POST	<code>/api/events/{id}/results</code>	Captures a participant result.	Organiser	enrolmentId, finishTime, overallPosition, categoryPosition, averagePace, finishStatus	201 Created; 400 Bad Request; 404 Not Found; 409 Conflict
PUT	<code>/api/events/{id}/results/{resultId}</code>	Corrects an existing result.	Organiser	result fields	200 OK; 403 Forbidden; 404 Not Found
GET	<code>/api/events/{id}/route</code>	Returns stored route information.	Public	None	200 OK; 404 Not Found
GET	<code>/api/events/{id}/weather</code>	Returns current/fresh weather using an external weather service.	Public	None	200 OK; 404 Not Found; 502 Bad Gateway

Design notes

1. Authentication endpoints issue a token for role-based authorisation.
2. Organiser operations are restricted to events owned by the authenticated organiser.
3. Participants can only view or cancel their own enrolments and personal results.

4. Public event browsing does not require authentication.
5. Route information is stored in the database; live weather is treated as an external-service integration.
6. Part 2 should keep route names and contracts close to this plan; deviations should be documented in the README.
